

Protect yourself, your community, your environment, and family and friends. The proper disposal of needles and syringes is important!

WHY?

- Used sharps can cause injury & spread blood-borne diseases
- Hepatitis B, Hepatitis C, and HIV can all be transmitted by needlesticks

PROPER DISPOSAL

- If you do not have access to a sharps container, place sharps in a puncture resistant container such as a rigid plastic bottle or coffee can. Lid must be secured, screwed or taped shut for disposal
- *Please use size appropriate for quantity being disposed but not more than 3 quarts for each container*
- Deposit full sharps container(s), with secured lid at sharps collection kiosk **NO LOOSE NEEDLES!**

HELPFUL HINTS

Be Safe: Reduce your risk of blood-borne diseases like hepatitis and HIV/AIDS

DO: Find out your HIV/viral hepatitis status. Get tested. If you are not infected you can stay that way. If you are, find out how to take care of yourself and avoid passing HIV/viral hepatitis to others

DO: Bring a sharps container when traveling

DO: Put used syringes in sharps container immediately

DO: Use a new needle every time you inject

DO: Clean your sharps with bleach IF you must reuse them

DO: Clean the injection site with soapy water, alcohol swabs or rubbing alcohol

DO NOT: Inject in the same spot over and over again

DO NOT: Throw needles, syringes and sharps containers in the garbage or in recycling bins. See inside brochure for drop-off locations in Andover

DO NOT: Clip, bend or recap needles

NEVER: Flush sharps down the toilet or drop into storm drains

SAFE SHARPS DISPOSAL

**needles, syringes,
lancets, ...**

Sponsored by

***in cooperation with
Andover Health Division***

**As of July 1, 2012
it is illegal to dispose of
sharps in household
trash.**
